

User-Manual

Screenimage Pro

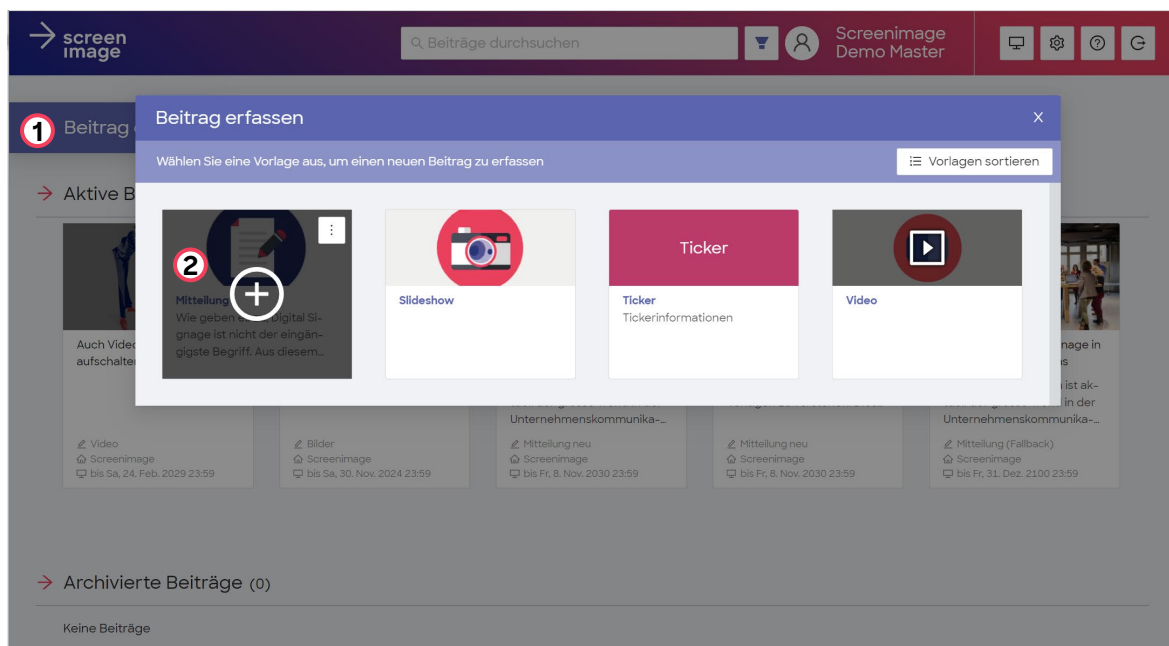

Access / Login

1. open: <https://app.screenimage.ch/>
2. enter username and password
3. click on "Login"

Create a new post

+ Capture post

Click the "Create contribution" button (1) and select the appropriate template (2).

Header

- Display period: Here you define the validity of the post.
- Display duration: You define the duration of the post in the loop (post sequence).
- Target group: You define the screens on which your post will be displayed.

Content area

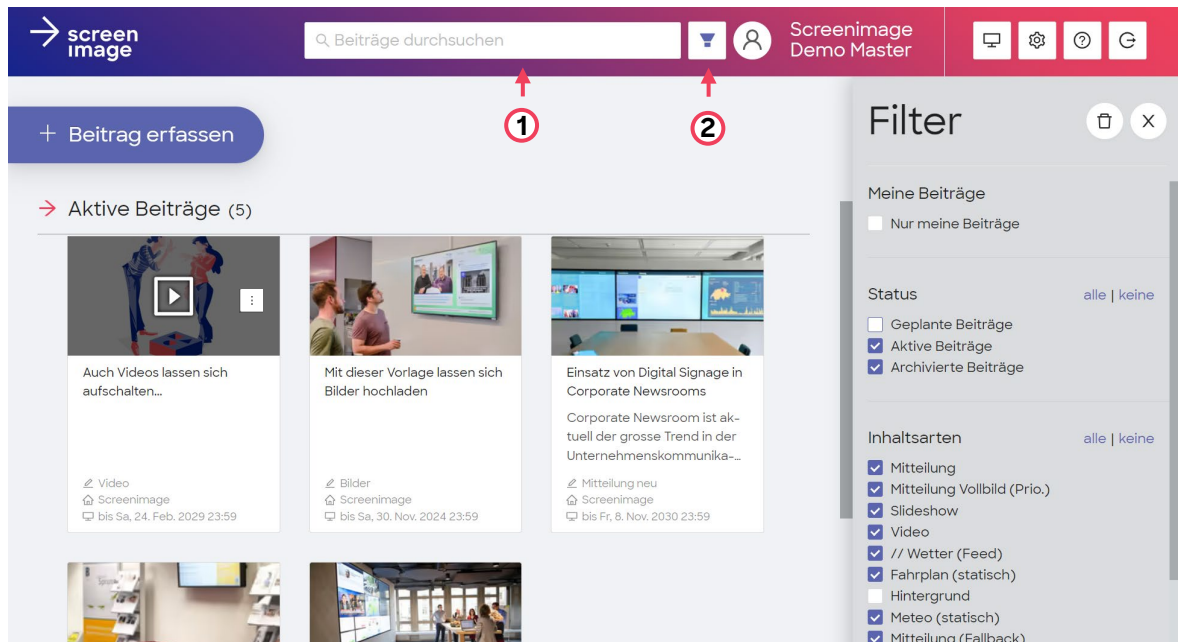

Depending on the template, different content areas are available. Here is a selection:

- Text fields: You enter text in these fields.
Multi-line text fields have formatting options.
- Images/Videos: Click on the image field or use drag & drop to upload images and videos.
- Images can be cropped
 - Depending on the template, the image size and position can be adjusted.
- QR code: You insert the URL to a web page -> Screenimage automatically generates a QR code for display.
- URL: You insert the URL of the web page to be displayed on the screen.

Save

When you are satisfied with your entries, click save

Post Management

Finding contributions

When searching for contributions, you have the following options to find them:

1. By entering a "keyword" in the search field
2. By filtering the contributions

Editing contributions

You can edit, copy, delete or save created contributions as a template at any time. To do this, click on:
